

# Improvement in LUMBAR Pain, and Activity, Sleep, Mood and Stress

*Pain Assessment Using the Defense and Veterans Pain Rating Scale \*(DVPRS)*

- Regenesis has Patient Care Coordinators in routine contact with patients prescribed Reprive by Regenesis
- Presented here are patients who reported on the pain-related measures; included are over 2,000 patients who reported a baseline DVPRS pain score during in-service; over 1,000 patients also reported baseline activity, mood, sleep, and stress scores

## Clinically Meaningful Reduction in Pain

## Significant Improvements in the Biopsychosocial Impact of Pain

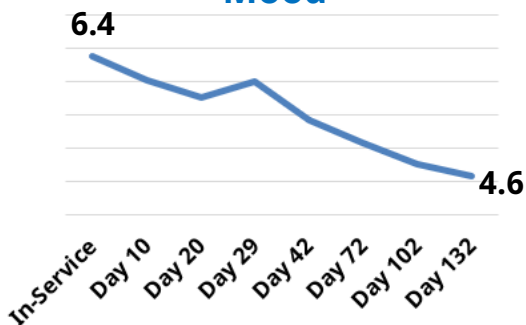

### Activity

### Sleep

### Mood

### Stress

\* For more information on the Defense & Veterans Pain Rating Scale (DVPRS), see <https://www.dvcipm.org/clinical-resources/defense-veterans-pain-rating-scale-dvprs/>
