

Improvement in Pain associated with DIABETIC NEUROPATHY, and Activity, Sleep, Mood and Stress

*Pain Assessment Using the Defense and Veterans Pain Rating Scale (DVPRS)**

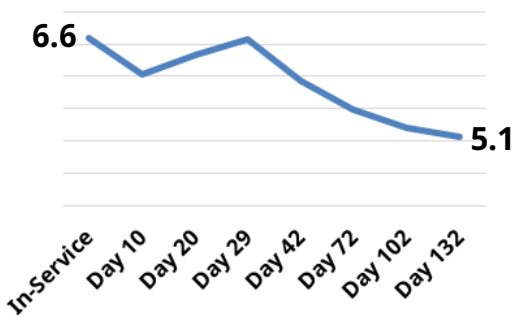

- Regenesis has Patient Care Coordinators in routine contact with patients prescribed Reprive by Regenesis
- Presented here are foot patients who reported on the pain-related measures; included are over 300 patients who reported a DVPRS baseline pain score during in-service, and reported baseline activity, mood, sleep, and stress scores

Clinically Meaningful Reduction in Pain

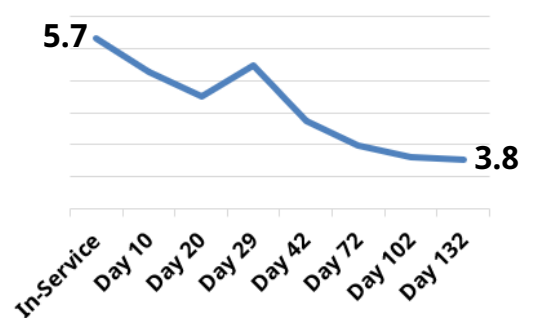

Significant Improvements in the Biopsychosocial Impact of Pain

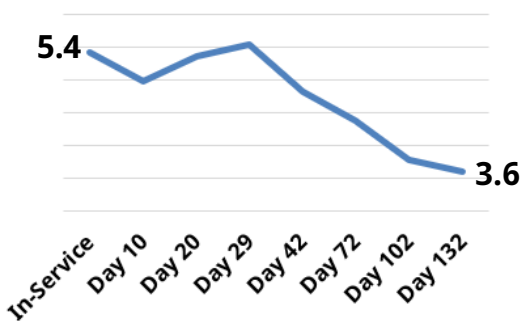

Activity

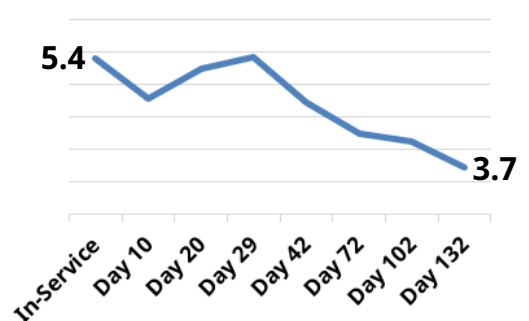

Sleep

Mood

Stress

* For more information on the Defense & Veterans Pain Rating Scale (DVPRS), see <https://www.dvcipm.org/clinical-resources/defense-veterans-pain-rating-scale-dvprs/>
